

# Get care when you need it, where you need it

When you're sick or hurt, you want to get the right care at the right time. **You should always call 911 or go to your nearest emergency room if you have a life-threatening emergency.** But you can save time and stress by knowing what kind of care you should get and where.

**Primary care:** Unless your life is in danger, call your primary care provider (PCP) first. They know your health history and what treatments will work best for you. You can visit your PCP for anything from a sore throat to cancer screenings. If your PCP can't provide the care you need, they will help you find someone who can.

**Behavioral health care:** Behavioral health care includes services for mental health care and drug and alcohol use disorders. Your primary care doctor can help you find a behavioral health provider if you don't have one.

**Urgent care:** Go to urgent care if you have a non-life-threatening condition, your PCP is not available or you cannot wait for an appointment. Consider going to urgent care if you have<sup>1</sup>:

- Mild asthma symptoms
- Mild abdominal pain
- Sprains or strains
- Fever

**Dental care:** Dentists are prepared to help you with your dental needs. Unless you have a life-threatening emergency, call your dentist for any issues related to oral health.

**Emergency care:** Save the emergency room for emergencies. Emergency rooms are meant for life-threatening conditions, such as<sup>1</sup>:

- Chest pain
- Difficulty breathing
- Head injuries
- Bleeding that won't stop
