

Preferred Language Cards Printing Instructions

This printable format creates 3.5 inch x 4 inch cards which are meant to be folded in half and shared with members, patients or consumers. To create your own cards, set the printer to duplex (double sided) printing and we recommend a mid-weight cardstock for best results.

If you send the format to a professional printer we recommend 80# Cover Dull Coated paper. If the cards are to be printed on a copier that has the capability to print on cardstock use 80# Cover Brilliant White.
