

County LCAC Meeting Minutes

DATE: JULY 5, 2018

*LOCATION: GILLIAM COUNTY
COURTHOUSE, COURTROOM*

MEETING CALLED BY	Jennifer Bold
CALLED TO ORDER	12:09
ADJOURNED	1:30
NOTE TAKER	Teddy Fennern
ATTENDEES	Mary Ann Wren, Advantage Dental; Neil Freidrich, DSH Self Sufficiency Manager; Teddy Fennern, Coordinator; Jennifer Bold, Condon Child Care; Paul McGinnis, GOBHI, EOCCO; Marci McMurphy, GOBHI, Frontier Veggie Rx Program Coordinator; Steve Shaffer, Gilliam County Judge

Presentation: Mary Ann Wren Advantage Dental Update
 Discussion: Mary Ann stated that we did get the grant funding that we had put in for to get a virtual dentistry started in Gilliam County. She stated that she knew that we had talked about the Gronquist building and was wondering if there were any other places that they may be able to utilize also. The Clinic has some concerns with the Gronquist building and stated that we could temporarily set up in their building. There were conversations about maybe the clinic could move too. That is on the table with the Health District Board to review. David Anderson is looking into all of this, but we need to get up and moving on this.

- There was some discussion that we could talk with the Condon Clinic and see if we could utilize the space that Dr. Mike is currently in, but that could be tricky
- Mary Ann stated that the space that the Arlington Clinic is offering could work
- Steve has met with everyone on the health district board and they all have stated that they would like full time dentistry down there
- Paul – what are the physical requirements to get this up and going
 Just need a space big enough to hold like a fold out lawn chair for the dentist chair and a chair next to it, because she will bring all of the other items with her.

It sounds like the North Clinic may have space. Jennifer stated that she has an empty conference room that could be available. The dosage needs to be very consistent, someone there on a weekly basis, but given the population size not sure if that would be necessary. It will be one of those things that we need to just start doing and see what it ends up becoming. Start out with at least one time a month. Dr. Schwartz stated that he would be willing to come out here and talk with us if we wanted. Steve thought that it would be beneficial to meet with the Arlington Clinic also. Mary Ann asked if there was someone that would be willing to ask about the ability to utilize the space at the Condon Clinic. Teddy and Jennifer stated that they could go and ask. Paul asked, what exactly is the virtual part of the equipment? There is a hand held w-ray unit; intraoral camera; The idea is that we will be treating those that don't need to see the dentist for restorative care. If we did have the operatory though, they would be putting people on the schedule to have the dentist actually come there to prove the service right there. Conversation was that we all liked the idea of the Child Care Center to be the space to serve dental clients here. Have to make their first report back to the EOCCO in August or September on progress.

Old Business: Veggie Rx Update

DISCUSSION	Chanell Kelly, Consumer Parent stated that she has recently received her Veggie Rx Booklet. She shopped and stated that she was very grateful and thought that it was awesome. Marci asked if she just got one booklet or one
-------------------	---

	<p>for each of the family members. She stated it was just one booklet. Marci asked who she was prescribed through, and it was stated that through Healthy Families, Farrell Fox. There was some discussion around this that we needed to make sure that everyone was trained and making sure that we get booklets out for each family member as well. There was an example of the voucher booklets. Front page states where they can be used.</p> <p>We changed from Gorge Grown that the booklets are all printed on heavy paper and perforated. The first page is a tear out page to track each of the booklets with a QR code on them. They are to be taken out by the prescriber and turned in with their reports. This will attach the booklets to the people and we can then see later if they are utilizing all of their vouchers and could then ask them why if they are not utilizing all of their vouchers. The group thought this is great feedback so that we can see how the program is going. Marci also talked about the number of doses that our community has and whether or not we should be advertising the program, or just have prescribers approaching their clients to sign them up and word of mouth. Marci had a concern that with advertising that we would get a lot of people and then all the vouchers would be out the door and then we would not have enough or any left for later date. Maybe we should get a couple of months of data and see how the program is going. Neil Freidrich was thinking that we would probably not need to worry about not having enough to go around and that we could probably advertise it. Jennifer Bold also thought that Family Dosage is important to be giving out during the summer and spring break, etc., as it is more expensive to feed your families during this time. She feels that is better than sending back bags of vouchers that didn't get used. Marci stated that with the QR codes we will be able to track the numbers that didn't get used and will know how many to be printing in the next printing so that we are surer about the number of vouchers to be deployed. We only have 757 or something like that in the dosages that we can use in Gilliam County for the whole program. Consumers want to stay with the original prescribers but if they were going to change there needs to be communication so that everyone knows who is going to be prescribing. Teddy and Marci discussed making a few changes to the Frontier Veggie Rx Brochure and put in our providers to contact.</p>
<p>Old Business: Colorectal Cancer Screening Project Update</p>	
<p>DISCUSSION</p>	<p>John Adams was not here, so Teddy stated that she had some of the FIT kits to distribute. She handed out a page of where she had been and made presentations and how many kits she had distributed. 2 from individual conversations presented and distributed 6 kits at the Condon Senior Meal site and put an educational piece in the Gilliam County Newsletter that went out to all postal patrons, and just hung up flyers all over the place, and was able to hang up one at the Pharmacy right on the counter for everyone to see and read. Paul asked where the kits were being mailed to. Teddy stated that we are partnering with the Arlington Medical Center, and they are being mailed or taken in there. We are also providing postage for people to mail the kits in. We are hoping that people are actually using the kits and mailing them in. Teddy stated that in conversations with people that they are indicating that they are already getting their colonoscopies and they are good for 10 years. Jennifer is in hopes that if this is successful that we are able to start pushing them down in the age groups. She stated that the fastest growing rate of</p>

	colorectal cancer is people in their 20's. Paul stated in the younger people it is attributed to obesity.	
OLD BUSINESS	IM Progress Report 2017	
DISCUSSION	We got the 2017 report to look at. Gilliam County met the metrics on Adolescent well care visits with a rate of 50%; we met Childhood Immunizations with a rate of 85.7% with a target of 72.9%; we met dental sealants with 32.2% and a target of 20%; and we met Ambulatory Care and ED Utilization with 37.34 and a target of under 51.8. We missed the Colorectal Cancer Screening rate of 43.9% with a rate of 29.6% missed by 4 people; we missed Developmental Screening rate of 57.3% with a rate of 50% missed by 1 person; we missed Effective Contraceptive Use rate of 48.1% with a rate of 30.3% missed by 6 people and we missed Alcohol and Drug Misuse rate of 15% with a rate of 8.4% missed by 13 people.	
New Business: IM Progress Report April 2018		
DISCUSSION	Currently Gilliam County is only meeting the Ambulatory Care and ED Utilization and the ED Utilization for Mental Illness. We are working on all the other Incentive Measures. These numbers are expected at this point in time. The explanation from the LCAC meeting so that we can understand the new IM. The ED Utilization for Mental Illness. These are people who are diagnosed with a mental illness going to the ED Department for a physical health complaint. The next meeting we will have the report with the real defined benchmarks for 2018.	
New Business: EOHLA Update		
DISCUSSION	Gilliam County is working on Colorectal Cancer Outreach to get people screened, they are still doing a lot of Mental Health First Aide for schools and first responders. This is a really well received program. Jennifer stated all her staff took the training at an in-service day. They did get continuation funding from the Knight Cancer Research Center. We have met with John Adams a few times to try to hash out how we will work on this. EOHLA is still doing a lot and have had a few recent articles in the Newspapers. They have talked a lot about working on Obesity as it often is the root cause of a lot of issues. Paul stated that Morrow County is a recipient of Cancer Screening resources and the press release went to the Eastern Oregonian, and Paul got a call out of the blue about why only Morrow County is eligible. They wanted to know why people in Umatilla couldn't get the kits. Paul stated that an OHP member could go to their provider and get a kit and it will not cost them anything. Other Business, Misc. Items: Chanell talked about needing help with OHP. Paul stated that he could help her get some assistance. They could talk after the meeting.	
ACTION ITEMS	PERSON RESPONSIBLE	DEADLINE
• Minutes of April and June	Steve/Chanell	MSP
•		

Next meeting scheduled for August 2, 2018
