

Community Advisory Council Needs Assessment Baker County – December, 2013

Background, Community Engagement, and Areas of Focus

Background

In 2010, the Affordable Care Act was signed into law with the goal of making health care more effective and efficient. The law strives to achieve the “Triple Aim” of better health, better quality and lower costs. The State of Oregon applied for a Medicaid Waiver to implement its own plan to achieve the Triple Aim. This plan includes using Coordinated Care Organizations (CCOs) as the vehicle to deliver better care and lower cost. In addition, Health Exchanges will facilitate the goal of offering more health care coverage to people who currently do not have any.

The Eastern Oregon Coordinated Care Organization (EOCCO) includes the following counties; Baker, Gilliam, Grant, Harney, Lake, Malheur, Morrow, Sherman, Umatilla, Union, Wallowa, and Wheeler.

Map provided by Oregon Office of Rural Health

Community Advisory Council’s (CACs) were formed in each county to accomplish transformation goals; they organized themselves in a way that allows them to work effectively and strategically. CACs identified the resources and activities communities need to achieve intended results.

Every community is different, but there are similarities in the process by which communities mobilize to affect change. Leadership, Assessment, Planning, Implementation, and Evaluation are critical phases of change.

Community Advisory Council Needs Assessment Baker County – December, 2013

Local Community Advisory Council Membership

The primary charge of each LCAC is to advocate for preventive care practices, to oversee and collaborate with community partners on a Community Needs Assessment, and to develop, implement and report on a Community Health Improvement Plan.

CAC Members currently serving Baker County:

Marji Lind, Chairperson	Amy Johnson
Alicia Hills, Vice Chair	Anthony Washington
Michael Fedderly, Secretary	Melissa Grammon
Fred Warner, County Judge	Will Benson
Charlotte Dudley, CAC Coordinator*	Win Lohner
Kelly Poe	Mary Jo Carpenter
Tammy Pierce	Chris Knoll
Carole Webb	Jodel Thatcher
Cindi Bowman	Dr. Dan Hayden
Cindi Denne	Ideal Partners
Mary Stearns	Chris Knoll

*not LCAC member

Quantitative Data Collection

EOCCO Community Advisory Councils conducted a Community Health Assessment by collaborating with the Oregon Health Authority Office of Equity and Inclusion to develop meaningful baseline data on health disparities.

Each LCAC partnered with local public health authority, local mental health authority, hospital systems, local public agencies, consumers, and local health service providers to develop a shared Community Health Assessment process. Existing county resources were used from community partners when available.

In reviewing the data sets below it should be noted that the death rates are not age-adjusted and thus populations with a greater elderly population will have higher rates. Also, in small populations' data that is expressed as a rate where the time period under consideration is only one year one or two cases may skew the data/rate inordinately.

Community Advisory Council Needs Assessment

Community Advisory Council Needs Assessment Baker County – December, 2013

Community Engagement Process

Community Advisory Councils used qualitative assessments to explore values, perceptions, and the “why” behind the “what” of community members. These assessments do not strive for a statistical sampling. Rather they reach for the reason behind the numbers generated from the quantitative assessments such as surveys, vital statistics and behavioral risk factor studies.

Qualitative assessments help the assessment process to determine the distance between what the statistics show as a community need and what the community perceives as a need. CAC members choose to provide two or more of the community engagement techniques in the form of a Household Mail-out Survey, Community-Wide Participation Meeting, or Key Informant Interviews. Summarized results from qualitative assessments which were held by the Baker County CAC are included in this report.

Health Assessment Mail-Out Survey

The household mail-out survey is an assessment tool with the greatest potential for accurately determining and measuring “what” or “how” a population is thinking, feeling, behaving, regarding a specific issue or set of issues. Each local Community Advisory Council wanted to ensure a diverse representation of community members in their qualitative data collection. In total, 3,098 community members in nine rural counties participated in the survey and are representative of each respective county in terms of geography, age, and race / ethnicity. Typically more females than males responded to the survey.

The table at the end of this report provides an overview of survey findings. The goal was to identify community members’ perceptions of the most pressing community health issues. In summary, the primary concerns in *each* of the respective counties are obesity and alcohol and other substance use / abuse. Domestic violence and child abuse were also noted among half of the counties as either primary or secondary community health concerns. Respondents also reported problems related to access to health care in rural Oregon.

There is a particular nuance within the behavioral health data that warrants further investigation. While 20 percent to 40 percent of respondents reported being bothered by little interest in doing things and by feeling down or depressed, less than 12 percent reported needing treatment for mental health issues (or substance use). This difference indicates that respondents were more likely to experience feeling emotionally “down” or depressed but less likely to seek help for these feelings; or to believe their distress needed attention. These data seem even more significant when compared to other health needs. For example, over 80 percent of all respondents received needed medical care and between 43 percent and 94 percent received the dental care they needed.

Community Advisory Council Needs Assessment Baker County – December, 2013

The Community-Wide Participation (Vision) Meeting

The Community-Wide Participation Meeting allows members of the community to freely voice their concerns and satisfaction with the local health care system. The meeting provides an opportunity to express their perceptions about community health issues. Most importantly, it also invites community members to share their hopes for local health care – their vision. This assessment is a modified version of the nominal group technique. The Participation Meeting helps create a vision of what can change to make the community a healthier place.

The results of the participation meeting tell us three things; **1) what residents like about the current local health care delivery system. 2) what the community does not like about the current local health care delivery system 3) what the community thinks can be done to make their community healthier.**

Results from the Community Vision meeting are determined by the participants at the end of the meeting. Sticker dots are placed by each participant to indicate issues they feel are a priority issues in their communities.

The following summary is compiled based on the combined results of meetings held in Huntington, Unity and Baker City during September/October 2013. An **X** next to an idea means that one person put three of their dots on that idea. Each idea also denotes the community name from which the idea was generated. The ***italic/bolded*** items were among the top 3 dot getters at each meeting.

Primary Care

Travelling (Mobile or based at School) Nurse Practitioner or Physician Assistant for Smaller Communities-31 (Huntington)

PA/NP in Community on a Regular Schedule (1x week, 1x month) – 10 (Unity)

Access to Care 24/7 -10 (Baker City)

Emergency Services

More Experienced Emergency Medical Personnel to Allow for Transport-21 (Huntington)

Prevention/Health (Education – Activities)

Active After School Programs (Physical Activity)-19 (Huntington)

Community of Health Promotion and Wellness/Destination of Health -10 (Baker City)

Home Health and Senior Care

Hospice Care in the Community – 15 X (Unity)

Transportation

Public Transportation to Services – 6 (Unity)

Community Advisory Council Needs Assessment Baker County – December, 2013

Other

Create More Jobs – Lower Unemployment -8 (Baker City)

Focus Groups

A focus group is a data collection procedure in the form of a carefully planned group discussion among about ten people plus a moderator and observer, in order to obtain diverse ideas and perceptions on topic of interest in a relaxed, permissive environment that fosters the expression of different points of view, with no pressure for consensus.

A focus group was held September 2013 with residents in Halfway to discuss the health system in Baker County. Below is a summary of the key issues raised in focus group discussion.

The moderator asked the group what they felt were the most pressing health system problems facing Halfway and Baker County.

- Danger of losing Pine Eagle Clinic
- Limited services to residents living in Halfway area
- Pharmacy delivery service provided by the Pine Eagle Clinic will gain tax payer support
- Improved access to Medicaid people in Baker County
- Oral Health included into Coordinated Care Organization will be helpful
- Mental Health and Alcohol and Drug treatment is lacking and needed in the county

The moderator shifted the conversation and asked the group what they perceived were the biggest health status issues for Halfway and Baker County.

- Children's need for better nutritional food, increased nutrition programs are needed in the schools
- Early identification needed in youth (7th and 8th grades) for signs of depression which leads to alcohol use among teens
- Bringing professionals from outside the county into the schools to address issues such as bullying, sex education, drug and alcohol use.
- Breaking cultural barriers to early intervention and detection of mental health and alcohol and drug services
- Lack of exercise is a health status issue; lack of a community gym

The moderator shifted the conversation to having the group prioritize what issues to tackle first.

- Keeping the Pine Eagle Clinic viable and secure; coordinated care needed
- Care Coordination for people with simple to complex issues needs to improve for elderly as well as for youth
- Early identification and prevention are critical
- Need to break cultural barriers that stop people from seeking needed services

Community Advisory Council Needs Assessment Baker County – December, 2013

BAKER COUNTY SUMMARY

Partners

The Baker County LCAC has had several partners who have attended four or more meetings over the past 8 months. Thirteen individuals from eleven agencies represent the group. *New Directions Northwest* (Anthony Washington, Melissa Grammon), *Mountain Valley Mental Health* (Marji Lind), *State of Oregon Department of Human Services (Aging and People with Disabilities/ Cindy Bowman and Community Outreach/Tammy Pierce)*, *Baker County* (County Commissioner/Fred Warner), *Baker Health Department* (Alisha Hills), *Building Healthy Families* (Amy Johnson), *Parole and Probation* (Will Benson), *St Alphonsus/Baker Clinic* (Carol Webb), *St Luke's Clinic/EOMA* (Cindy Denne, Chris Knoll), *Malheur ESD Hub* (Kelly Poe). (Estella Gomez from the Oregon Health Authority and Wyn Lohner from the Baker City Police Dept attend when able.)

Priority Needs

GOBHI provided several staff members to support the Baker LCAC in developing a draft needs assessment. Sandy Ryman presented a majority of the primary data to the LCAC during monthly meetings. Linda Watson did a community needs assessment workshop during the July 2013 LCAC meeting. Members of the LCAC held four community health care meetings. They were in Halfway, Unity, Huntington, and Baker City. In October 2013, Ari Wagner presented a power point that combined primary data with the community mail surveys. Paul McGinnis provided a triangulation report and helped the council to conduct a forced choice matrix.

At the first LCAC round table, mental health became an established priority. Baker County residents who participated in the community meetings and the respondents to the EOCCO mail survey also listed mental health services as a need. State data indicates that suicide rates are higher in Baker County compared to the state. The mail survey and primary state data indicates that Baker County residents report having a high rate of health conditions. This paired with the recommendations from the United States Preventive Services Task Force encouraged the selection of Prevention and Screenings as a priority need. The EOCCO mail survey, the Oregon Smile Survey, and consistent concerns raised by community services providers indicate that oral health (dental) need to be addressed in Baker County.

- 1. Mental Health Care**
- 2. Prevention and Screenings**
- 3. Dental and Oral Care**
